**Subject:** update - two items

Chloroprene response. Richard and I spoke with Anne and David Gray R6. They will develop a companion letter to follow our response recognizing the efforts Danko has made to reduce emissions and the commitment to evaluate monitoring data for use in future assessments.

Formaldehyde. ORD and OAR met with the ACC Formaldehyde panel and had very productive discussions. They shared their thinking on evaluating formaldehyde risk and asked us on the status of our assessment. Along with questions to OAR on their upcoming regulatory actions. They reiterated the concern you have raised about information leaking before it's been vetted and asked that the Agency have appropriate communication materials ready to use if needed.

Richard and I would be happy to meet with you and talk about next steps for formaldehyde.

Thanks

jennifer
